Reporting Rate and Timeliness

Water Borne Diseases details

- The number of the reported STF cases was 1509, as well as 1056 new cases of AJS were reported.
- EWARN reported 18037 OAD cases, The number of OAD cases have not doubled
- On 29th August 2018, EWARN received an alert about 5 AWD cases (suspected cholera cases) from Kaljibrin village _ A'zaz district. On Friday 27.08.2018, a case of 72 years old female presented with severe dehydration after acute diarrhea and vomiting, she was admitted to the hospital and managed well. 3 other members of the family (14, 11, 10 years) suffered from the same signs just after 6 hours from the grandmother signs start but one of them (female 11 years old) died at home as a result of dehydration, the fifth case (female 12 years) suffered from mild similar signs on 31.08.2018. RDT was negative for the 4 suspected cases, adequate stool samples were collected in Cary Blair media. The result that came from EWARN lab was negative for cholera vibrio in the four sampled cases.
- Water source: All the family members drink the house tank water that collected from private wells and disseminated through tankers, testing the samples from the house tank showed a high number of coliforms (not E.Coli) in the house tank, thus it is not safe for drinking.

[For more details please click here.](#)

- Water borne diseases risk scale is being generated and followed on community level and on monthly basis in all EWARN coverage areas.
- EWARN informed partners & WASH team about the districts with high WBD levels.

Vaccine Preventable Diseases details

In Epi-week 36 /2018, 142 cases of suspected measles were reported.

- 3 suspected measles cases were investigated in Epi week 36 in: Ar Raqqa 2 and Harim 1.

- EWARN labs reported 1 positive case for Measles IgM in Idlib 1.

- In the Epi week 36/2018, the reported cases from Ar Raqqa governorate were 83 new cases distributed as followed (Ar Raqqa district 78 ,Tell Abiad 4, Ath-Thawrah 1).

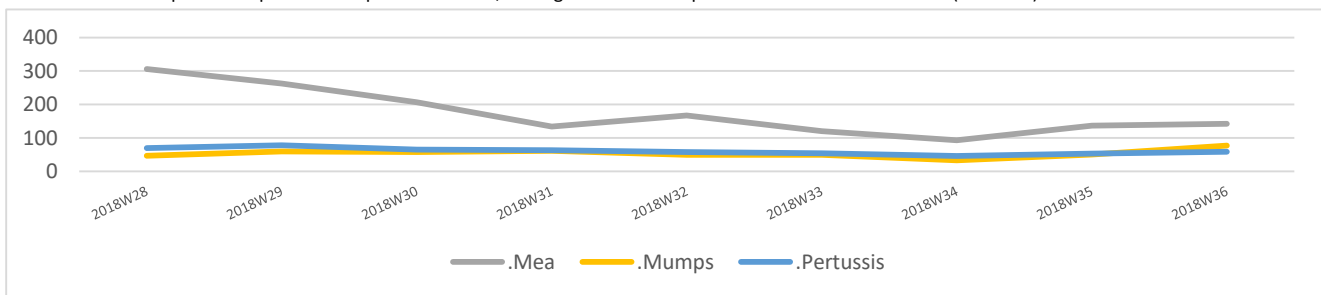

- In Deir ez zor governorate the reported cases were 28 new suspected cases as follows (Deir ez zor district 20, Mayadin 5, Abu Kamal 3). While reporting in Aleppo decreased toward 8 cases of suspected measles, as follows: Al Bab 1, A'zaz 3, Jebel Saman 4.

- The reporting of new measles cases from different areas of Deir-ez- Zor ,Ar Raqqa , rural Aleppo and Idlib is still ongoing.

- It was recommended to: isolate the cases, personal hygiene, providing vitamin A and explain to parents about the importance of the vaccine.

- The number of the reported suspected Pertussis cases was 59, the highest number reported from Al Mayadin (15 cases).

- The number of the reported suspected Mumps cases was 77, the highest number reported from Deir ez zor district (40 cases).
