Reporting Rate and Timeliness

Water Borne Diseases details

- The number of the reported STF cases was 2560, as well as 840 new cases of AJS were reported .
- EWARN reported 23120 OAD cases, There is no district reported a duplication in OAD cases
- As a result of reporting high cases number of water-borne diseases (acute diarrhea - suspected typhoid) in Rural Damascus (Hammura - Arbin – Kafr Batna), a screening for water sources which are used in 11 ice factories was conducted by WASH team in between 3rd – 12th June. The water samples in Hammouria and Arbin were collected from ice factories and markets , while they were collected from the wells used in Kafr Batna. The results came as follows: Kafr Batna: 3 out of 4 wells - used as a water sources of ice factories - were not safe for drinking and contaminated Hammura and Arbin: 4 out of 7 ice factories samples came not safe for drinking and contaminated
Recommendations: using safe sourced of water for ice making – raising the awareness of the best ways for water treatment at home and safe storage .
EWARN team is disseminating posters about the prevention of water contamination, in addition to providing chlorine to the ice factories in the area.
- Cholera Risk scale is being generated and followed on weekly basis in the northern of Syria.
- EWARN informed partners & WASH team about the districts with high WBD levels.

Prop. Morb. of Water Borne Diseases

Vaccine Preventable Diseases details

In Epi-week 25/2017, 332 cases of suspected measles were reported.

- Laboratory confirmation of positive Measles IgM for 22 suspected measles cases.

- A total 11 suspected cases were investigated in Epi Week 25 (Rural Aleppo 7, Rural Al-Hasakeh 2, Tell Abiad 2).

- In the Epi week 25/2017, 238 new cases of suspected measles were reported (Abu Kamal 140, Al-Mayadin 79, Deir ez Zor district 19), 21 new suspected measles cases were reported from A'zaz (Aleppo.) The reporting of new measles cases from different areas of A'zaz and Deir-ez-Zor is still ongoing.

- It was recommended to: isolate the cases, personal hygiene, providing vitamin A and explain to parents about the importance of the vaccine.

- It is important to consider measles vaccination campaigns, taking into account the spread of outbreaks, populations at risk and age groups at risk.

- The numbers of the reported suspected Pertussis cases was 95, the highest number reported from both Abu Kamal district (23 cases).

- The numbers of the reported suspected Mumps cases was 52, the highest number reported from Jebel Saman district (22 cases).
