### Water Borne Diseases details

- The number of the reported STF cases was 2610, as well as 709 new cases of AJS were reported .
- EWARN reported 26036 OAD cases, the number of OAD cases have not doubled
- Follow up on the alerts of suspected typhoid fever in rural Damascus , many activities were implemented in total coordination with the medical council in Eastern Gota : Health workers meetings to re orient them about case definition and reporting mechanism , in addition to disseminating the chlorine to the ice factories.
- Cholera Risk scale is being generated and followed on weekly basis in the northern of Syria.
- EWARN informed partners & WASH team about the districts with high WBD levels.

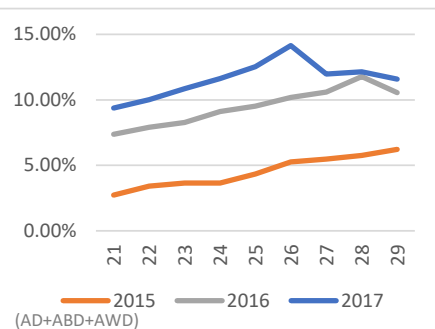

## Vaccine Preventable Diseases details

In Epi-week 29/2017, 290 cases of suspected measles were reported.

- Laboratory confirmation of positive Measles IgM for 47 suspected measles cases.
- A total 2 suspected cases were investigated in Epi week 29 in Rural Aleppo .
- In the Epi week 29/2017 , 198 new cases of suspected measles were reported (Abu Kamal 101, Al-Mayadin 77 , Deir ez Zor district 20), 37 new suspected measles cases were reported from Menbij (eastern Aleppo.) The reporting of new measles cases from different areas of Menbij and Deir-ez- Zor is still ongoing.
- Confirmed the death of two suspected measles cases in A'zaz, 1st case is a 1.5 years female with severe pneumonia , and the 2nd is a 2 years female with acute encephalitis .
- It was recommended to: isolate the cases, personal hygiene, providing vitamin A and explain to parents about the importance of the vaccine.
- It is important to consider measles vaccination campaigns, taking into account the spread of outbreaks, populations at risk and age groups at risk.
- The numbers of the reported suspected Pertussis cases was 96 , the highest number reported from Abu Kamal district (22 cases).
- The numbers of the reported suspected Mumps cases was 66, the highest number reported from Jebel Saman district (14 cases).
