Reporting Rate and Timeliness

Water Borne Diseases details

- The number of the reported STF cases was 2586, as well as 707 new cases of AJS were reported .
 - EWARN reported 25084 OAD cases, The number of OAD cases have not doubled.
 - Investigation the alert of suspected typhoid fever in Jasim _ Dar'a : total number of the suspected cases 23 (14 females and 9 males) from Epi week 26 up to Epi week 29 . Many activities were implemented in coordination with the local council in Jasim , water sources sampling (3 wells and ice specimen), the shortage in the amounts of liquid chlorine needed for wells disinfection .
- Recommendations:
- FUP the results of water sources testing
 - Supply chlorine for distribution to wells considered as water sources
 - Control the water treatment procedures in ice factories
 - Health workers meetings to re orient them about case definition and reporting mechanism.
- Cholera Risk scale is being generated and followed on weekly basis in the northern of Syria.
 - EWARN informed partners & WASH team about the districts with high WBD levels.

Prop. Morb. of Water Borne Diseases

Vaccine Preventable Diseases details

- In Epi-week 30/2017, 251 cases of suspected measles were reported.
- 34 confirmed measles cases (positive IgM0 out of 52 sampled suspected cases.
 - A total 6 suspected cases were investigated in Epi week 30 (4 in Rural Aleppo and 2 in Rural Idleb).
 - In the Epi week 30/2017 , 168 new cases of suspected measles were reported from Deir Ez zor as follows : (Abu Kamal 104, Al-Mayadin 49 , Deir ez Zor district 15), 34 new suspected measles cases were reported from Menbij (eastern Aleppo.) The reporting of new measles cases from different areas of Menbij and Deir-ez- Zor is still ongoing.
 - MSF activated 6 routine vaccination centers in Menbij , including : MR , Penta , OPV, BCG vaccines.
 - It was recommended to: isolate the cases, personal hygiene, providing vitamin A and explain to parents about the importance of the vaccine.
 - It is important to consider measles vaccination campaigns, taking into account the spread of outbreaks, populations at risk and age groups at risk.
 - The numbers of the reported suspected Pertussis cases was 70 , the highest number reported from Abu Kamal district (16 cases).
 - The numbers of the reported suspected Mumps cases was 57, the highest number reported from Menbij district (15 cases) .
