Reporting Rate and Timeliness

Water Borne Diseases details

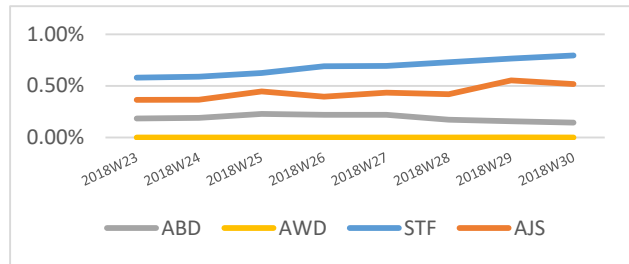

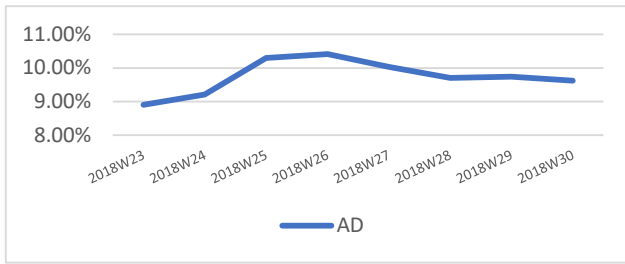

The number of the reported STF cases was 1684, as well as 1053 new cases of AIS were reported.

- EWARN reported 19013 OAD cases, the number of OAD cases have not doubled
 - The field team received an alert of increasing the cases number of OAD on 26th July from Al Amal clinic and camp managers of Farjeh and Qneirat camps (Kafir Lucin- Atmeh), upon investigation
 - 80 cases of other acute diarrheea OAD were reported (62 cases < 5 years - 18 cases > 5 years) within the following 10 days .
 - No suspected cases of Cholera were detected (dehydration in children more than 5 years or deaths)
 - All cases were treated conservatively outside the hospital and cured within 24 hours
- An investigation of the water sources in the area resulted that the camps are supplied with water from private wells that are not supervised for both disinfection either transport.

There is no hygiene promotion support neither waste management in the area.

Recommendations:

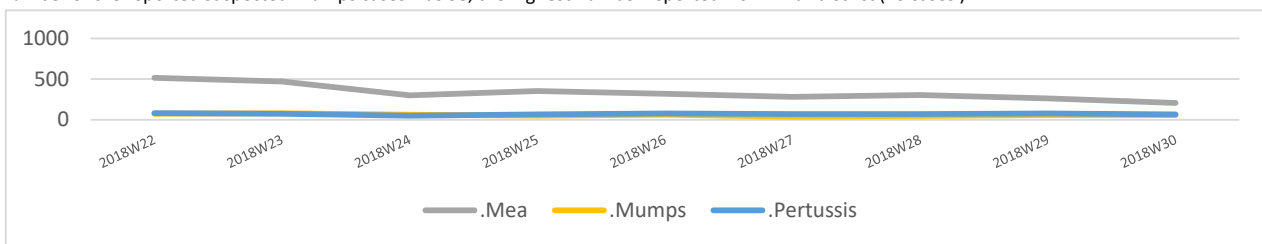

- Coordination with the local council to monitor the condition of the wells and tankers (disinfection and distribution of safe water).
- Re-orientation of the health workers about case definition of suspected cholera, other acute diarrheea, and case management.
- IEC materials dissemination about the importance of hand hygiene, Acute diarrheea and suspected cholera.
- Water borne diseases risk scale is being generated and followed on community level and on monthly basis in all EWARN coverage areas.
- EWARN informed partners & WASH team about the districts with high WBD levels.

Vaccine Preventable Diseases details

In Epi-week 30 /2018, 207 cases of suspected measles were reported.

- 5 suspected measles cases were investigated in Epi week 30 : Aleppo 1, Al Hasakeh 2, Deir ez Zor 2.
- In the Epi week 30/2018, reporting from Ar Raqqa governorate has decreased to 67 new cases of suspected measles and distributed as followed (Ar Raqqa district 51 ,Tell Abiad 12, Ath-Thawrah 4).
- In Deir ez zor governorate the measles outbreak is still ongoing and there are 76 new suspected cases as follows (Deir ez zor district 48, Mayadin 22, Abu Kamal 6).
- The reporting of new measles cases from different areas of Deir-ez- Zor ,Ar Raqqa , rural Aleppo and Idleb is still ongoing.
- It was recommended to: isolate the cases, personal hygiene, providing vitamin A and explain to parents about the importance of the vaccine.
- The number of the reported suspected Pertussis cases was 65, the highest number reported from Al Mayadin (20 cases).
- The number of the reported suspected Mumps cases was 58, the highest number reported from A'zaz district (10 cases).
