

# Weekly WASH Related Diseases Bulletin

## Highlights:

- Chlorination coverage in Al Mayadin was 80.65% in the last three weeks, while it was in Deir-Ez-Zor 75% and in Abu Kamal 84.21% in the last three weeks. Most of water stations used Liquid chlorine and they had Free Residual Chlorine (FRC) less than guidelines.
- Participation in WBD in Deir-Ez-Zor task force, which included:
  - Deir-Ez-Zor WBD data updates + mapping by sub district, chlorinated stations review.
  - Reparation needed for many water stations with focus on Al Mayadin station as it serves population of 200,000.
  - The effect of Primitive oil refining and any evidence based hazard
  - Identify critical geographic locations in terms of water borne diseases prevalence and numbers of population
  - /5/ sub-districts were selected as priorities: Al Mayadin, Ashara, Deir-Ez-Zor, Khasham, Hajin .These locations are inhabited by an estimated number of 997919 people and are served by 33 water treatment plants.
  - An initial assessment will be carried out by engineers to define an outline of needs per plant. On the health side the case management training will prioritize the training of health staff in the selected districts.

Week 7	Water Resources	Chlorinated	Not Chlorinated	Chlorination Percentage
Abu Kamal	38	32	6	84.21%
Al Myadeen	31	25	6	80.65%
Deir-Az-Zor	52	39	13	75.00%

Week 8	Water Resources	Chlorinated	Not Chlorinated	Chlorination Percentage
Abu Kamal	38	32	6	84.21%
Al Myadeen	31	25	6	80.65%
Deir-Az-Zor	52	39	13	75.00%

Week 9	Water Resources	Chlorinated	Not Chlorinated	Chlorination Percentage
Abu Kamal	38	32	6	84.21%
Al Myadeen	31	25	6	80.65%
Deir-Az-Zor	52	39	13	75.00%

## Abu Kamal

No reported cases of Acute Watery diarrhoea(AWD) since the first week of 2014.Compared to the previous weeks, there is a slight decrease of Acute Bloody Diarrhoea (ABD) and Acute Jaundice Syndrome (AJS) and Suspected Typhoid Fever (STF).Whereas there is a slight increase of Leishmaniasis (LEISH) .

## AL Mayadeen

No reported cases of Acute Watery diarrhoea(AWD) since the first week of 2014. Compared to the previous weeks, there is a slight decrease of Acute Jaundice Syndrome (AJS) .Whereas there is a slight increase of Leishmaniasis (LEISH) and Acute Bloody Diarhoea (ABD) and Suspected Typhoid Fever (STF) .

## Deir-Ez-Zor

No reported cases of Acute Watery diarrhoea(AWD) since the first week of 2014.Compared to the previous weeks, there is a slight decrease of Leishmaniasis (LEISH) and Acute Jaundice Syndrome (AJS).Whereas there is a slight increase of Acute Bloody Diarrhoea (ABD) and Suspected Typhoid Fever (STF) .

Note:

Legend: Right axis: Chlorination Percentage, Left axis: Number of reported cases, Horizontal axis: weeks
